It's been quite a while since oldunreal had an overhaul, but we are moving to another server which require some updates and changes. The biggest change is the migration of our old reliable YaBB forum to phpBB. This system expects you to login with your username and old password known from YaBB.

If you experience any problems there is also the usual "password forgotten" function. **Don't forget to clear your browser cache!**

Strange that this has no page on TCRF...I've found plenty of unused content there.

Currently my editor freezes if any actor is selected on Windows 10. I ask anyone's help with fixing this issue.
